

When Your Medi-Cal Patient Needs Therapeutic Formula

Medically necessary therapeutic formula is a covered benefit under Fee-for-Service Medi-Cal and all Medi-Cal Managed Health Care Plans. The WIC Program does not provide therapeutic formula for patients who are enrolled in Medi-Cal.

The pharmacies listed below supply therapeutic formula to Medi-Cal recipients. When our WIC participants bring us a prescription for therapeutic formula, we provide this information to those enrolled in Medi-Cal. Given the current formula shortage, you may want to list the name of the preferred therapeutic formula and other equivalents in your prescription.

Pharmacy	Phone	Fax	Email Address
California Medical	213-413-2343 Press '3' for Supplies	213-413-2341	
Delta Drugs	800-700-6401	866-700-6401	info@deltadrugs.com
Dial Healthcare	310-515-8425	310-515-8426	dial@dialpharmacy.com

After receiving the prescription and the supporting documents, the pharmacy will occasionally ask for updated patient information. Please respond to them in a timely manner so that your patient can continue to receive their therapeutic formula without delay.

WIC requires a new prescription to ensure that your patient is ready for a different formula and/or new WIC foods, even if it is for a regular formula.

WIC Contract Infant Formulas available currently include:

Similac Advance

Enfamil ProSobee

Similac Sensitive

WIC also requires a prescription if your patient needs a contract or regular infant formula when they are over the age of 12 months. It must list a medical condition to justify its use.
